

MBM 352SA with Register System

The 352SA with Register System provides precision delivery to a cross-fold unit.

The MBM 352SA with Register System provides a straight feed into the fold rollers for consistently accurate folds.

The Register System uses the same convenient touch button control panel as the 352SA.

MBM 352SA with Register System Features

- Automatic stop in case of double sheet feed.
- Handles curled paper such as laser printed materials.
- Accurate first folds provide for precise, easy double folding.
- Bottom-feed, top-load design for continuous reloading and dependable sheet separation.
- Speed is adjustable, from 1 to 100% while running.
- Jog button with slow speed for checking paper transport.
- Perforating, slitting and scoring tools are available.
